

each of the feasible alternative means of providing drainage service to lands within the SLU. All reasonable alternatives as required by NEPA and its implementing regulations will be examined. Draft EISs prepared in the early 1980's and in 1991 for drainage solutions to the SLU will provide a useful beginning, thus allowing Reclamation to expedite completion of the analysis. Alternatives, with their related designs and cost estimates identified in these earlier efforts, will be re-evaluated and updated to reflect current conditions. Public input on additional alternatives, or combinations of alternatives, that should be considered will be sought through the initial scoping meetings. In addition, public input will be sought on the criteria that should be used to carry forward alternatives, or combination of alternatives, for further consideration.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

## SUPPLEMENTARY INFORMATION:

### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct.

The standard entitled "Occupational Exposure to Hazardous Chemicals in

<sup>1</sup> Based on its assessment of the paperwork requirements contained in this standard, the Agency estimates that the total burden hours increased compared to its previous burden-hour estimate. Under this notice, OSHA is *not* proposing to revise these paperwork requirements in any substantive manner, only to increase the burden hours imposed by the existing paperwork requirements.
